PROJECTS

AI Interview Coach — Full-Stack Interview Simulation Platform

React.js, Node.js, Express.js, Gemini API, Tailwind CSS, Web Speech API

- Architected an interactive full-stack interview simulation platform using Node.js, Express, and Google's Gemini API (gemini-2.5-flash) to deliver real-time, adaptive technical interview evaluation and feedback.
- Integrated browser-native Web Speech and Camera APIs to enable hands-free voice input, audio response feedback, and video simulation for realistic user engagement.
- Developed a clean, modular client dashboard using React.js, React Router, and Tailwind CSS, implementing secure API interactions with CORS, dotenv configuration, and structured state management.

AI Sentinel — Smart Attendance & Security System

- Built real-time face detection pipeline using Haar Cascades for fast object recognition
- Implemented LBPH algorithm for robust, accurate face recognition across varied conditions
- Developed live video processing with OpenCV; integrated MySQL for automated attendance logging
- Eliminated manual registers by fully automating the attendance marking workflow
